SUMMARY

Frontend Developer specializing in React and Next.js. Shipped 50+ production features across web and mobile. Focused on performance, clean architecture, and building responsive, user-focused interfaces. Experienced in fast-paced Agile teams and modern frontend ecosystems.

EXPERIENCE

MelkPro, Remote — Frontend Developer

AUG 2025 - JAN 2026

- Implemented real-time notifications using **WebSockets** and Pusher JS, reducing update latency from ~8s to under 1s for property inquiries, price changes, and new listings.
- Built a production-grade B2B real estate mobile app with **Expo**, implementing optimistic UI updates that cut perceived loading times by 40% and increased user interaction efficiency.
- Architected the state and data layer with TanStack Query and Zustand, reducing application complexity by 35% and improving data consistency across web and mobile platforms.
- Developed reusable component libraries and design systems using shadcn/ui (web) and NativeWind (mobile), accelerating UI development by 45% and maintaining consistent branding and UX across all client-facing platforms.
- Developed a real estate web platform with Next.js 15, leveraging server actions to improve data mutations and overall page responsiveness.

Codinoob, Tehran, Iran — Frontend Developer

FEB 2025 - JUL 2025

- Engineered and maintained responsive user interfaces for multiple client projects using **Next.js**, improving front-end development speed by 25%.
- Refined state management with Redux and RTK Query, eliminating boilerplate code by 30% and boosting API data flow efficiency, reducing load times by 20%.
- Orchestrated feature rollouts, testing, and production deployments using **GitLab CI/CD**, reducing deployment times by 20% in an Agile environment.
- Designed and launched 30+ responsive UIs using Next.js, accelerating development by 25% and ensuring seamless user experiences.
- Built custom UIs **without** relying on external UI libraries, resulting in fully tailored

interfaces and a more lightweight front-end architecture, reducing external dependencies by 35%.

Nilasoft, Remote — *Frontend Developer*

JAN 2024 - FEB 2025

- Revamped legacy Angular codebases, integrating Angular Signals to improve component performance and reduce unnecessary re-renders by 20%, enhancing overall app speed.
- Enhanced the UI of a high-traffic landing page, optimizing mobile responsiveness and accessibility, increasing usability scores by 15%.
- Integrated and customized Leaflet maps, boosting user engagement by 10%.
- Collaborated with the team to ensure compliance with coding guidelines, reducing code inconsistencies by 25%.
- Adopted Jira for sprint planning, issue tracking, and task management, boosting personal productivity and aligning with Agile team workflows.

SKILLS

React, Next.js, Next.js App Router, Server Actions, cache components, React Native (Expo), TypeScript, JavaScript (ES6+), TailwindCSS, SCSS, CSS3, HTML5, Zustand, Redux, RTK Query, TanStack Query, Git, REST APIs

EDUCATION

JAN 2024 - ONGOING

Islamic **Azad** University, Karaj - *Bachelor's Degree in **Computer Science***
